Bureau of
Statistics

SEPTEMBER, 1992

I EXECUTIVE SUMMARY

Population projections have been prepared for the 8 Economic Regions of Manitoba during the period 1991 - 2016. These projections are compatible with the medium level Manitoba population projections recently released by the Manitoba Bureau of Statistics.

Under these regional population projections, the 8 regions can be placed into 3 groups based upon the projected population change between 1991 and 2016 (population up, population down significantly and population down slightly).

The 4 regions **Southeast, South Central, Winnipeg and Interlake** are projected to have increasing populations throughout the projection period.

The populations of the **Southwest and Parklands** regions are projected to decrease by 17.0% and 18.5% respectively between 1991 and 2016.

For the **Southwest**, the population drop of 17,700 (from 104,300 in 1991 to 86,600 in 2016) is due to a projected interprovincial migration outflow of 19,500 and an intraprovincial migration outflow of 3,900 for the projection period. This outflow is slightly offset by a projected natural increase (births minus deaths) of 2,200 and an international migration inflow of 3,600.

For the **Parklands**, the population loss of 8,600 (from 46,400 in 1991 to 37,800 in 2016) is due to a projected interprovincial migration outflow of 4,500, a projected intraprovincial migration outflow of 3,600 and a natural decrease of 1,500. These losses are partially offset by an international migration inflow of 1,000.

The **North Central and North** regions are projected to have small population drops, decreasing in population by 1,100 (2.4%) and 900 (1.2%) respectively by the year 2016.

Winnipeg will have the largest projected overall population increase at 78,100 (a 12.7% increase over the 1991 population of 616,800).

The **Southeast** will have the largest projected percentage population increase at 30.8%, based on a projected increase of 23,900 above the 1991 population of 77,600.

II INTRODUCTION

This report presents population projections for the 8 Manitoba Economic Regions during the period June 1, 1991 - May 31, 2016. The 8 Economic Regions (also known as Official Regions for Data Collection) are aggregations of the 23 census divisions as follows:

ECONOMIC REGION	CENSUS DIVISIONS	1991 BASE POPULATION
Southeast	1, 2, 12	77,600
South Central	3, 4	49,300
Southwest	5, 6, 7, 15	104,300
North Central	8, 9, 10	46,300
Winnipeg	11	616,800
Interlake	13, 14, 18	74,500
Parklands	16, 17, 20	46,400
North	19, 21, 22, 23	76,600
	TOTAL	1,091,900

These regional projections are compatible with the medium level Manitoba population projections recently released by the Manitoba Bureau of Statistics. The base population for these projections is the Statistics Canada 1991 Census figure of 1,091,900 for Manitoba distributed on a regional basis.

Projections are not forecasts but are based on what would occur if the stated assumptions hold true. The assumptions are based on recent trends and reflect the impact on regional populations if these trends were to continue. As the process of change is cumulative, the reliability of the projections may decrease over time.

Population projections can be prepared for departments' and agencies' user-defined areas, departmental regions or special sub-populations on a cost-recovery basis.

To obtain further information on this report or to order custom projections, please contact David Greenwood at (204) 945-2989.

Table 1. Projected Regional Population by Year: 1991 to 2016

Both Sexes

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1991	77,600	49,300	104,300	46,300	616,800	74,500	46,400	76,600	1,091,900
1992	78,500	49,300	103,600	46,200	620,100	75,000	46,000	76,500	1,095,400
1993	79,400	49,400	102,900	46,200	623,700	75,500	45,600	76,400	1,099,000

III PROJECTED REGIONAL POPULATIONS: 1991 - 2016

Table 1 illustrates the annual projected population for Manitoba and its Economic Regions over the period 1991 - 2016. During this time, the population of Manitoba is projected to increase by 91,100 (8.3%).

Based on the projected population changes, the 8 regions fall into three groups.

GROUP 1 The regions in this group (Southeast, South Central, Winnipeg and Interlake) are all projected to increase in population throughout the projection period.

All 4 regions are also projected to increase their proportion of Manitoba's population (as shown in Appendix C). The Southeast's share is to increase by 1.47 percentage points (from 7.11% to 8.58%) while Winnipeg's share is increasing 2.25 points (from 56.49% to 58.74%) and the Interlake's share is projected to increase by 0.54 points in the next 25 years. An increase of only 0.05 percentage points is projected for the South Central region.

GROUP 2 The 2 regions in this second group (Parklands and Southwest) are both projected to have a population decline for the next quarter century. The population of Parklands is projected to fall 8,600 (18.5% of the 1991 base 46,400) while the population of Southwest is projected to decline 17,700 (17.0% of the 1991 population of 104,300).

The Parklands' share of Manitoba's population will show a large decline, from 4.25% of Manitoba's population in 1991 down to 3.20% by the year 2016. For the Southwest, it's share is projected to decrease from 9.56% in 1991 to 7.32% by 2016.

GROUP 3 The North Central and North are projected to have minor population losses over the projection period. From a 1991 base of 46,300, the population of North Central is projected to fall 1,100 (2.4%) by the year 2011. During the same time period, the North's population is projected to decline 900 (1.2%).

During this time period, the North Central's share of Manitoba's population is projected to fall slowly to 3.82% in 2016 from a value of 4.24% in 1991. Meanwhile, the North's share will be falling to 6.40% in 2016 from a present value of 7.01%.

Details of the projected regional populations are presented in Appendix A - D.

Data Source: Manitoba Bureau of Statistics

September 1992

IV i) BIRTHS

This section presents the projected births for the 8 Economic Regions to the end of the projection period. For projection purposes, the number of births is determined by the number of females 15 - 49 years of age, the total fertility rate and the age specific distribution of the total fertility rate.

The total fertility rate for each region has been assumed to remain constant at the 1991 level as shown in Table 3 below. The age specific distribution of the total fertility rate is the average for Manitoba for the last 4 years.

With these assumptions, the projected number of births is solely determined from the number of females in each age category between 15 and 49 years of age.

TABLE 3: TOTAL FERTILITY RATES BY REGION

	OBSERVED				PROJECTED
REGION	1976	1981	1986	1991	
Southeast	2.62	2.25	2.21	2.16	2.16
South Central	2.59	2.51	2.26	2.34	2.34
Southwest	2.19	2.03	1.90	1.92	1.92
North Central	2.41	2.24	2.21	2.28	2.28
Winnipeg	1.70	1.58	1.67	1.81	1.81
Interlake	2.17	1.85	2.00	1.76	1.76
Parklands	2.49	2.28	2.40	2.00	2.00
North	3.17	2.89	2.61	3.05	3.05
Manitoba	2.02	1.86	1.89	1.95	1.95

The Southeast will have a marked increase in the projected number of births, increasing by 300 or 25.6% over the 1991 level of 1,170. This is in comparison to Manitoba which is projected to have a drop of 10.9% during the next quarter century.

South Central and Interlake are projected to have an increase in the number of births, with South Central increasing by 80 births (10.4%) over the projection period. The Interlake's births are projected to increase by 14.1% (120 births).

The five other regions are projected to have decreases in the number of births with Southwest declining by 370 births (26.6%) while North Central declines by only 8.0% (60 births). Parklands, the North and Winnipeg are all projected to have percentage declines in the "teens" at 13.7%, 15.4% and 16.2% respectively.

Table 4. Projected Regional Deaths by Year: 1991 to 2016

Both Sexes

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1991	500	460	1,070	400	5,040	640	570	390	9,060

Data Source: Manitoba Bureau of Statistics

September 1992

ii) DEATHS

This section presents the projected number of deaths for each of the Economic Regions. For projection purposes, the number of deaths is derived from the life expectancy at birth for each region.

From the life expectancy tables, survival rates by sex and single years of age were determined. These survival rates are then used as the probability of a person being alive at the start of the following year.

During the next 25 years, the life expectancy at birth is projected to increase approximately 4 years for each region with the largest increase of 4.5 years occurring in North males. The lowest increase of 3.7 years is assumed to occur in South Central males.

Table 5: LIFE EXPECTANCY AT BIRTH BY REGION (In Years)

	FEMALE			MALE		
REGION	1991	2001	2016	1991	2001	2016
Southeast	80.4	82.2	84.9	75.2	76.7	79.4
South Central	81.2	82.7	85.0	76.1	77.5	79.8
Southwest	80.7	82.2	84.5	73.5	75.2	77.7
North Central	79.7	81.2	83.5	73.8	75.5	78.0
Winnipeg	79.4	81.0	83.5	72.8	74.6	77.2
Interlake	80.6	82.4	85.0	73.7	75.5	78.3
Parklands	78.9	80.5	82.9	71.7	73.7	76.6
North	77.5	79.6	82.7	69.2	71.4	74.7
Manitoba	80.0	81.5	83.8	73.4	75.0	77.5

For the Southeast, the number of deaths is projected to increase by 300 (60.0%) to the end of the projection period. In contrast, the number of deaths in the Parklands is projected to decrease by 60 (10.5%) during the same period.

The number of deaths is also projected to decrease for Southwest (down 2.8%) and the North (down 2.6%).

The south Central will have the smallest projected increase at 4.3% (20 deaths).

For the North Central, Winnipeg and Interlake regions increases of 5.0%, 24.0% and 28.1% respectively are projected.

Table 6. Projected Regional International Migration: 1991 to 2015

Both Sexes

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1991	150	170	70	30	3,070	40	30	50	3,600
1992	170	180	90	30	3,390	40	30	60	4,000
1993	190	200	110	40	3,710	50	40	70	4,400

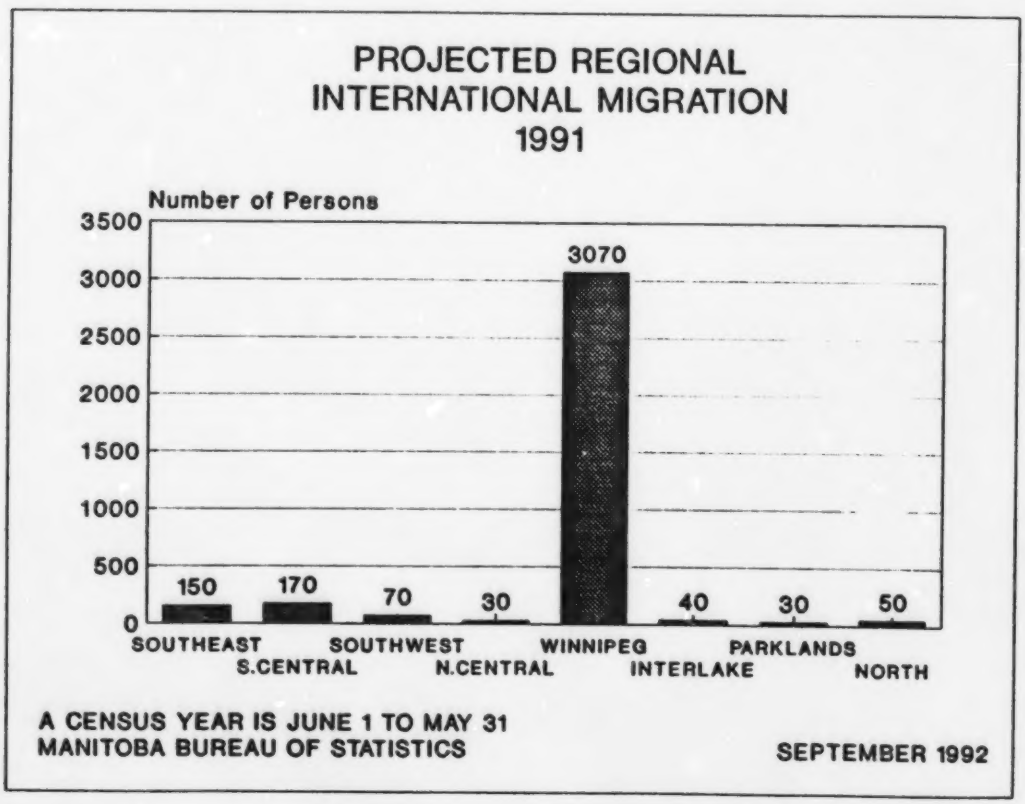
September 1992



MIGRATION SCENARIOS

As the most volatile component of population growth, migration has the greatest impact on the year-to-year change in the population of Manitoba's regions.

For these regional projections, the migration scenarios have been developed using the in and out flows for each of the three components: international, interprovincial and intraprovincial. However, in this report only the net figure is presented for each migration component.

The data presented are estimates of the regional migration distributions for the 11 year period June, 1979 to May, 1990. The data for the projection period has been calculated from the historical percentage distribution for each region and the projected Manitoba level for each migration component.

iii) INTERNATIONAL MIGRATION

TABLE 7: INTERNATIONAL MIGRATION BY REGION 1979 TO 1990

	IMMIGRATION		EMIGRATION	
REGION	11 YEAR AVERAGE	PERCENT DIST'N	11 YEAR AVERAGE	PERCENT DIST'N
Southeast	210	4.2%	70	4.0%
South Central	180	3.6	30	1.7
Southwest	270	5.5	190	11.8
North Central	90	1.7	60	3.6
Winnipeg	4,020	80.6	1,180	72.4
Interlake	70	1.5	40	2.3
Parklands	40	0.8	10	0.9
North	110	2.1	60	3.4
Manitoba	4,990	100.0%	1,630	100.0%

As shown in Table 7, the majority of international migrants to Manitoba in the last 11 years have moved to Winnipeg. This dominance is projected to continue as shown in Table 6.

Although a small component of population growth for the other regions, it is projected that all regions will have positive international migration throughout the projection period.

Table 8. Projected Regional Net Interprovincial Migration by Year: 1991 to 2016

Both Sexes

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba

September 1992

iv) INTERPROVINCIAL MIGRATION

Interprovincial migration (movements of Canadians between Provinces) is the most volatile component of the three migration types and can have the greatest impact on the year-to-year change in the populations of Manitoba's regions.

Table 9 shows the recent distribution of net interprovincial migration by region for the period 1979 to 1990. As can be seen, each region lost population due to interprovincial migration during this time period.

TABLE 9: INTERPROVINCIAL MIGRATION BY REGION 1979 TO 1990

	IN		OUT	
REGION	11 YEAR AVERAGE	PERCENT DIST'N)	11 YEAR AVERAGE	PERCENT DIST'N
Southeast	820	4.5%	990	4.2%
South Central	440	2.4	550	2.3
Southwest	1,930	10.5	2,520	10.8
North Central	740	4.0	910	3.9
Winnipeg	11,390	62.0	14,340	61.6
Interlake	650	3.5	780	3.3
Parklands	690	3.8	810	3.5
North	1,720	9.3	2,400	10.3
Manitoba	18,400	100.0%	23,300	100.0%

This population loss to interprovincial migration is projected to continue throughout the projection period. However, due to the ageing of the population and a decreased propensity to migrate, the net interprovincial migration is projected to moderate from the level of -8,100 in 1991 to -6,000 for the last 10 years of the projection period.

Winnipeg will have the largest projected population loss at -4,900 for 1991, moderating to -3,630 by the year 2006.

The North is also projected to have a large out flow of -1,030 in 1991, moderating to -780 by the year 2006. The Southwest's outflow is projected to be -700 for the last 10 years of the projection period.

The South Central, Parklands and Interlake are projected to have smaller out flows, declining to -130, -160 and -170 respectively by 2006 and remaining at these levels for 10 years.

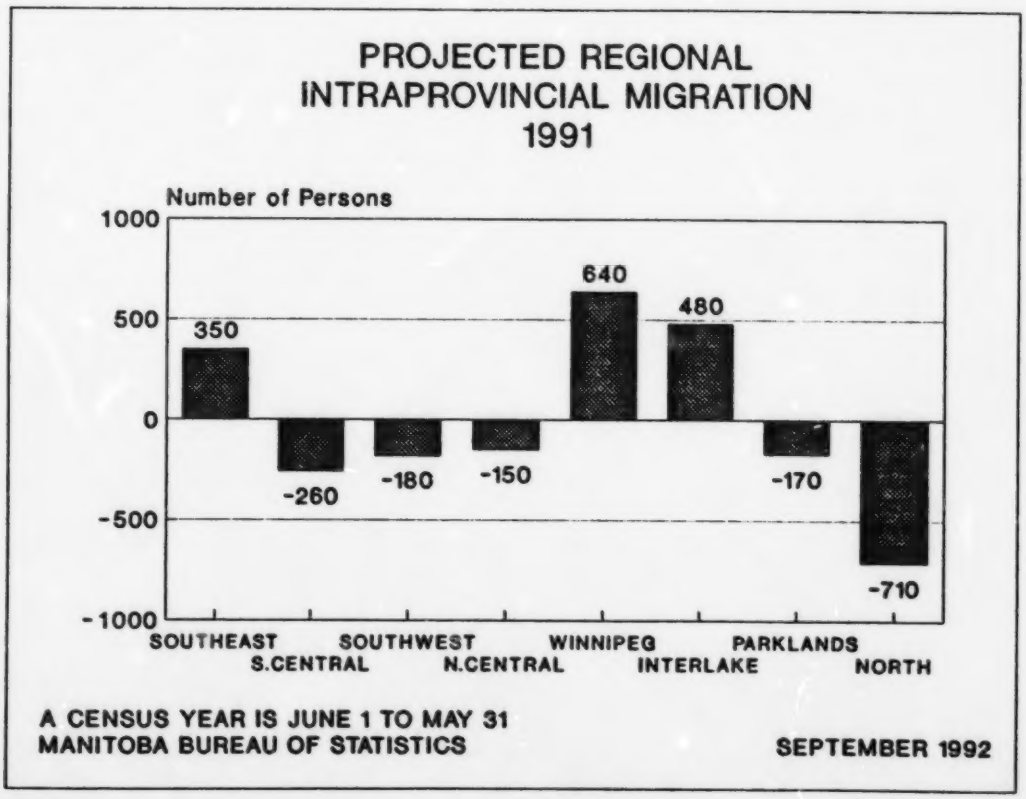
Southeast and North Central are projected to have out flows of -220 and -210 respectively by the year 2006.

Table 10. Projected Regional Intraprovincial Migration: 1991 to 2015 — Both Sexes

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1991	350	-260	-180	-150	640	480	-170	-710	0
2006	280	-210	-140	-120	510	380	-130	-560	0
2015	280	-210	-140	-120	510	380	-130	-560	0

Note: A Census Year is June 1 to May 31
Manitoba Bureau of Statistics

September 1992



INTRAPROVINCIAL MIGRATION

Table 11 below, illustrates the net intraprovincial migration (movements of Manitobans between regions of Manitoba) for the 11 year period 1979 to 1990.

During this period, population gains from intraprovincial migration were registered by Winnipeg, Interlake and Southeast. The remaining regions registered losses for this type of migration with the North having the largest loss at -710 persons annually.

TABLE 11: INTRAPROVINCIAL MIGRATION BY REGION 1979 TO 1990

	IN		OUT	
REGION	11 YEAR AVERAGE	PERCENT DIST'N	11 YEAR AVERAGE	PERCENT DIST'N
Southeast	3,020	13.2%	2,670	11.7%
South Central	1,140	5.0	1,400	6.1
Southwest	2,190	9.6	2,370	10.4
North Central	1,360	6.0	1,510	6.6
Winnipeg	8,630	37.9	7,990	35.0
Interlake	2,860	12.5	2,380	10.4
Parklands	1,450	6.4	1,620	7.1
North	2,150	9.4	2,860	12.5
Manitoba	22,800	100.0%	22,800	100.0%

As shown in Table 10, the North is projected to have a significant net intraprovincial out flow for the entire projection period ending at annual rate of -560.

Winnipeg is projected to have a net in flow for the same period of 510 persons per year.

The Interlake and Southeast are also projected to have net in flows at 380 and 280 persons per year after 2005.

However, South Central is projected to have net out flows of -210 for the last 10 years of the projection period.

North Central, Parklands and Southwest are projected to have more moderate net out flows of -120, -130, -140 respectively for the same time period.

Table 12. Projected Regional Net Total Migration by Year: 1991 to 2016

Both Sexes

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1991	210	-270	-1,050	-410	-1,200	290	-360	-1,690	-4,500
1992	220	-250	-1,010	-400	-800	290	-350	-1,660	-3,960

September 1992

TOTAL MIGRATION

Total migration is the sum of the three migration components as described on the previous pages. Table 12 shows the projected total migration for each region. For migration purposes, the regions appear to fall into two groups.

The first group, consisting of Southeast, Winnipeg and Interlake is projected to have positive total migration to the year 2010.

The Southeast and Interlake are projected to have population growth from total migration. For the **Southeast**, a net value of 210 for 1991 is projected to increase to 270 within 5 years and remain at that level, resulting in a total population gain from migration of 6,600 over the projection period. For the **Interlake**, slightly higher total migration is projected to result in a population gain from migration of 7,000 over the 25 year period.

Winnipeg is projected to receive the largest population gain with small losses in the first 4 years, changing to an annual gain of 1,100 for the last 10 years. The total population gain from migration for Winnipeg in the next quarter century is projected to be 15,000.

The second group, consisting of the remaining 5 regions is projected to have a migration out flow for the entire period although the extent of the out flow will continue to moderate to the year 2010.

The **North** will have the largest population loss due to migration with annual out flows projected from -1,690 in 1991 moderating to -1,260 by 2006. The total migration loss for the period is projected to be 34,800.

For the **Southwest**, a total projected out flow of 19,900 will be the result of a peak out flow of -1,050 in 1991 decreasing to -700 by 2006.

An out flow of -410 in 1991 dropping to -280 in 2006 will lead to a projected total loss of -8,000 for the **North Central** region.

South Central is the fourth region in this group, with a total projected migration loss of -4,000. This will be the result of a present loss of -270 moderating to -120.

From a net loss of -360 in 1991, the **Parklands** is projected to have a net total migration loss of -250 in 2006. For the entire period, the total population loss to out migration is projected to be -7,100.

APPENDIX

Table A1. Projected Components of Population Growth for the Southeast Region

Both Sexes

Census Year	Population (June 1)	Births	Deaths	Natural Increase	MIGRATION
